

Ramallah, Palestine, March 15, 2009 - MENA

Geothermal is pleased to announce that it has been awarded the prestigious ENERGY GLOBE AWARD 2008 – Palestine, today's most prominent and prestigious environmental prize, for its geothermal heating and cooling system in the UCI Headquarters Building, located in Ramallah, Palestine. The award honors companies and individuals for outstanding contributions in the fields of renewable energy, energy conservation, and environmental responsibility. Winners are selected from among 700 applicants world wide, and are chosen by an international jury comprised of prominent scientific, academic, and industry leaders.

The award recognizes MENA Geothermal's landmark UCI Headquarters building in Ramallah, Palestine, which houses the Middle East and North Africa's largest certified commercial application of geothermal heating and cooling technology.

"We are honored to receive this award, which recognizes the hard work of the MENA Geothermal team in the face of seemingly insurmountable challenges, and affirms our long-standing belief that geothermal technology is the most energy efficient, environmentally friendly, and economically viable space conditioning solution available, in any part of the world," stated Khaled Sabawi, President of MENA Geothermal. "The support and recognition of organizations such as the Energy Globe Award and the EU's MED-ENEC project play an integral part in encouraging the development of green energy technologies in developing economies such as Palestine."

A televised ceremony broadcast to over 75 countries will be held in the Czech capital of Prague, where the award will be presented to MENA Geothermal by high-ranking representatives of the European Union and with the attendance of numerous world dignitaries and luminaries.

MENA Geothermal is dedicated to advancing geothermal technology as an advanced, economical, and environmentally friendly answer to our future energy needs for efficient heating and cooling. Access the free energy in the earth and save up to 70% on your energy bills. www.menageothermal.com
